

BATHROOM FIXTURE RETROFITS FOR BUSINESS PROPERTIES

Custom rebate for water customers

Installing ultra-high efficiency toilets saves water and can earn a significant rebate. Projects replacing 1.6 (or greater) gallon per flush with 1.1 or 0.8 gallon per flush toilets qualify.

The rebate amount for each project is based on:

- Water use of existing toilets.
- Water use of replacement toilets.
- Number of toilets replaced.
- Number of units

The rebate is capped at \$50,000 per customer per year.

Sample rebate savings (2020 rates)

Toilet Type 1	
Total apartment units per planned toilet replacements	70
Total existing toilets in units	100
Total toilets being replaced	100
Gallons per flush of existing toilets	3.5
Gallons per flush of replacement toilets	1.1
Est. annual water savings (cubic ft.)	81,074
Est. annual savings bill	\$ 7,135
Total estimated annual savings	\$ 7,135
Estimated rebate amount	\$ 1,493

Requirements

- Rebate recipients must be business customers currently receiving Colorado Springs Utilities water service.
- Replacement toilets must be WaterSense® certified.

How to get started

1. Contact us to review the program rules.
2. Submit the [Custom Water Rebate Pre-Approval Request](#) form.
3. Schedule a pre-project inspection.

Don't remove existing toilets until you receive an *Approval to Proceed Letter*. This letter will list the program steps and estimate the rebate amount and monthly water savings.

More savings

Get free WaterSense showerheads and bathroom/kitchen aerators at csu.org. Save an average of \$25 to \$45 annually, per fixture.
